

Insulated flexible copper bars

Busbars

Function

SOCOMEK **insulated flexible** copper bars are mainly utilised for providing the power connections between series of distribution busbars and the disconnection devices within an electrical panel.

The insulated layered copper allows the flexible copper bar to be easily formed to provide a customised solution.

Advantages

Easy to install

- Compact version.
- High level of flexibility enabling easy manipulation of the busbar.
- Reduced installation time with the elimination of terminal lugs and their crimping.

Increased safety by the elimination of crimped connections

- Better behaviour under short-circuit conditions.
- Decreased number of heating points.
- More reliable connections.

Characteristics

- Width of 9 to 100 mm.
- Copper layer thickness from 0.8 to 1 mm.
- Length of 2 m.

Conductor

- Layers of electrolytic copper Cu/ETP, final annealing state.

Insulator

- High temperature co-extruded vinyl compound on the copper strips (insulation thickness: 1.5 to 2 mm).
- Self-extinguisher: NFC 32200 and UL 94 V0.
- Continuous temperature withstand: 105 °C.
- Shore hardness A: 89 +/- 2.
- Module 100 % elongation: 16 Mpa.
- Resistance to elongation: < 15 % mini.
- Breaking stress: 20 Mpa.
- Transversal volume resistivity: 6.1015 Ω.
- Oxygen index: 29.5 %.
- Scratch and tear resistant.

Insulated flexible busbar

- Operating-temperature range: from -40 °C to +105 °C.
- Maximum operating voltage: 1000 VAC / 1500 VDC.
- Alternating voltage withstand (10 minute test):
 - between core and insulation: 16.5 kV,
 - between two insulating elements in contact: 33 kV,
 - Conductivity: 100 IACS,
 - HV < 50,
 - Resistance to traction $R_m > 200 \text{ N/cm}^2$,
 - Stretch before break 35 %,
 - Resistivity: 1.724 micro Ω/cm at 20 °C.

The solution for

- > Electrical distribution.

Strong points

- > Easy to install.
- > Increased safety by the elimination of crimped connections.

Conformity to standards

- > VDE 207 Y16
- > BS 6746
- > NF A 51-050
- > VDE 207 YM4
- > DIN 40050

Available on request

- > Specific lengths.
- > Halogen-free.
- > UL.
- > Please consult us.

(1) For ambient air temperature of 40 °C
Important: max. busbar temperature = 105 °C.
L: length of bar in metres.

I: width of bare busbar in mm.
N: number of copper layers.
e: copper layer thickness in mm.

Implementation

Flexible bars should be mounted on insulated supports with a maximum distance of 400 mm. Bars should also be held together with straps, as shown in the above diagram.

The distance between successive straps depends on the electro-dynamic constraints in the event of a short-circuit. The table below gives the recommended distances between straps.

I _{cc} max. (kA rms)	Distance x between straps (mm) ⁽¹⁾
20	350
25	200
35	100
45	70

(1) 9 mm straps, load 80 kg.
